

AP Chemistry “Summer Work”: 2019-2020

Welcome to AP Chemistry. I am excited to work with you this year. AP Chemistry is an equivalent course to 2 semesters of Introductory Chemistry in college. Taking a college level course in high school is difficult, requires dedication, and is a great investment in your education. So, prepare yourself for the future and arrive to school on **August 21st** ready to learn!

Because we have so much material to cover and some of it should be a review of the material you learned in your first year of Chemistry, you may wish to refresh your memories over the summer. **However, this work is not mandatory and will not be collected.**

The **FlinnPrep module** provides an easy to use tool for any reviewing you might wish to do. There are 15 units total, but only the first 9 encompass things that we covered in first year chemistry. The syllabus for this module is attached. Below is an explanation of how each unit is set up:

- When you click on the unit, you will be prompted to do a PreTest. These are 10 questions that will let you preview what is coming up in that unit. These are not graded, but you will get to see which you get right and which you get wrong.
- Each unit has reading material, a few short videos (most are less than 5 min.), some “Quick Quizzes”, and a Final Assessment. The reading, videos and quizzes are designed to help prepare you for the final assessment.
- The final assessment consists of 20 multiple choice questions randomly selected from a bank of 50-90 questions.
 - No two assessments are the same.
 - If you score **80%** or higher on the assessment, the unit becomes locked and you can no longer retake the assessment.
 - If you score **less than 80%**, you will need to review the material and retake the assessment until you obtain a passing score.

What you need:

FlinnPrep Course

- You will need to join this course and create login information.
 - Go to flinnprep.com/Students
 - Where it says “Have a student linking code from your teacher?” Enter the following code: **8h2qt**
 - Click “Activate”

Chemistry, 9th Edition (AP Edition) Zumdahl

- This book will be provided to you before you leave school for the summer.

Looking forward to a great year!
